Ginny,

We are assisting with outreach in Dimock, PA. The extent of our involvement has been to support the OSCs by gathering information about people's private drinking water wells through a survey process. Attached is the fact sheet we produced for that effort FYI.

I am not aware of our products needing approval by the White House, however we did need to get approval from HQ/OPA and they generally did a good job turning things around quickly for us.

•Helen - Here is what was sent to me from our manager - I'll be the fracking guru CIC - I've spoken with folks in Ohio and probably will do more, but I want to see what you are doing to keep it consistent. Thanks a bunch....

•

•Region 3 mentioned that their CICs are assisting with public outreach and interviews in areas with drinking water wells where subsurface oil fracking is occurring.

Ex. 5 - Deliberative

Ex. 5 - Deliberative

**Something to keep in mind since fracking is being introduced in parts of Ohio and Michigan.**
